

THE AUSTRALASIAN COLLEGE OF SOFT TISSUE THERAPY
“Excellence in Practice Series - 2010”

PRESENTS A POST GRADUATE COURSE FOR HEALTH PROFESSIONALS

Mark Finch 2010 Australian Tour
Course 4 Melbourne

THE FASCIA, ITS STRUCTURE AND FUNCTION - PART 3
RESOLVING FASCIAL DYSFUNCTION IN THE
SHOULDER GIRDLE

Presented by Mr Mark Finch

WHEN: SATURDAY & SUNDAY NOVEMBER 27TH & 28TH 2010

TIME: 9.00 AM – 5.00 PM

WHERE: MELBOURNE CBD AUSTRALIA

WHAT:

The healthy Shoulder Girdle facilitates a great variety of movement between the thorax, scapula, clavicle and humerus. The sliding and elongation of myofascial tissues coupled with the bony architecture permit this broad range of motion. The freedom, function and stability of this girdle depend on the balance of tensions in the myofascial structures.

The very myofascial tissues that allow that great range of motion can also cause dysfunction. There are many fascial planes and interacting structures in this area that can not only restrict movement but compromise vessels and generate pain.

The arm, neck, thorax or shoulder itself can all be the site of pain in shoulder girdle dysfunction. The underlying myofascial restriction however can be in a distant site. Understanding the fascial layer interactions and junction points is useful addition for any clinician looking to restore function in the shoulder girdle.

What will you learn in this 2 day workshop?

- Learn to approach shoulder girdle dysfunction from a fascial perspective.
- Learn simple assessment techniques to make sense of this complex area.
- Gain useful clinical skills to restore movement and relieve pain in this area.

COURSE PRESENTER: Mr Mark Finch.

Mark is an engaging and dynamic presenter who brings humour and an incredible foundation of knowledge and clinical skill to his courses.

Mark maintains a busy practice in Vancouver, Canada focused on Structural Integration and teaches regularly throughout Nth America and Australasia.

Mark has been a bodyworker since 1996, training in Therapeutic Massage, Neuromuscular Therapy, Structural Integration (KMI) and Visceral Manipulation.
