

THE AUSTRALASIAN COLLEGE OF SOFT TISSUE THERAPY
“Excellence in Practice Series - 2013”

PRESENTS A POST GRADUATE COURSE FOR MANUAL THERAPY PROFESSIONALS

Mark Finch 2013 Australian Tour
Course 1 Melbourne

THE FASCIA, ITS STRUCTURE AND FUNCTION v1.5
RESOLVING FASCIAL DYSFUNCTION IN THE SPINE

PRESENTED BY MR MARK FINCH

WHEN: THURSDAY & FRIDAY
FEBRUARY 28TH & MARCH 1ST 2013

TIME: 9.00 AM – 4.30 PM

WHERE: MELBOURNE UNIVERSITY HAWTHORN CAMPUS

WHAT:

Pain and dysfunction in the spinal column are the most common reasons clients seek treatment. This amazing column is a complex arrangement of bones and tissue. A healthy spine allows fluid and easy movement in all planes; however spinal dysfunction is an all too common clinical finding. Imbalances, injury or poor movement patterns can create restrictions and fibrosity that compromise freedom and function in the spine. Understanding the role of fascia in spine dysfunction can be crucial to restoring its function.

The behavior of fascial tissues is becoming more precisely understood thanks to the work of many scientists around the world. Of interest to clinicians is understanding the functional role of fascia. The challenge for many clinicians is to integrate new scientific information into their hands-on practice in the clinic.

In this workshop you can expect to;

- Explore the architecture of the spine especially the transition zones and support systems.
- Understand the fascial layers and their implications in dysfunction.
- Learn tests to quickly determine to best treatment approach.
- Learn effective techniques to restore tissue mechanics at the spine.
- Understand how a fascial approach integrates into the clinical picture.

COURSE PRESENTER: Mr Mark Finch RMT KMI.

Mark is an engaging and dynamic presenter who aims to empower students with clinical understanding and precise technique.

He is an RMT who has been in practice for 16 years. He has certification in Massage Therapy, Structural Integration, Visceral Manipulation and has a special interest in Fascia and integrating its science into the clinic.

Mark presented Tom Myers' Anatomy Trains™ courses throughout the Americas and Australasia for 5 years and now conducts courses teaching his own unique approach to assessment and treatment. His clinical experience is broad and varied, including touring with the Riverdance company. Mark maintains a busy practice in Vancouver Canada and enjoys the outdoors and his family in his spare time.
