

THE AUSTRALASIAN COLLEGE OF SOFT TISSUE THERAPY
in conjunction with

PRESENTS A POST GRADUATE COURSE FOR MANUAL THERAPY PROFESSIONALS

Mark Finch 2015 Australian Tour Course 3 Melbourne

THE FASCIA, ITS STRUCTURE AND FUNCTION VM15.4
ONE DAY MASTERCLASS - CLINICAL REASONING
PELVIS TO FOOT

PRESENTED BY MR MARK FINCH

WHEN: MONDAY
OCTOBER 12TH 2015

TIME: 9.00 AM – 4.30 PM

WHERE: MELBOURNE UNIVERSITY HAWTHORN CAMPUS

Do you want to be updated into the key current findings of fascial research & how this knowledge can be integrated into your clinical practice?

Do you want to develop your assessment, clinical reasoning & treatment skills to achieve lasting measurable results?

This is a one-day class for students who have already taken the pelvis class. In this class we will widen the lens to include the whole lower limb, Pelvis to Foot. The function of the tissues and bones in the lower leg can have a dramatic impact on knee hip and pelvis dysfunction. Assessment of any dysfunction in the lower leg needs to include screening all the way down to the foot. In this one day class we will add screening tests for the lower leg and integrate the skills already learning on the Pelvis class to give the clinician a more potent set of tools to approach the whole lower limb, Pelvis to Foot.

In this workshop you can expect to;

- Learn to assess the alignment & movement of the pelvis, hip, thigh, lower leg & foot in standing, squatting & forward bending.
- Form a clinical hypothesis by correcting the structures found to be in non-optimal alignment & assessing the impact of this correction on the whole lower limb.

- Learn to palpation & treat soft tissue structures in the lower leg in the areas they hypothesize to be the optimal place to start.
- Re- assess the movement screen to determine if there has been a change in alignment, movement or patient experience & use this reassessment to further guide the reasoning process.

COURSE PRESENTER: Mr Mark Finch RMT KMI.

Mark is an engaging and dynamic presenter who aims to empower students with clinical understanding & precise technique.

He is a Registered Massage Therapist in Canada, who has been in practice since 1996.

He has training in Massage Therapy, Structural Integration (KMI) & Visceral Manipulation (Barral Institute).

He has a passion for treating myofascial tissues in all it's forms & clinically reasoning the most appropriate strategies for each individual patient.

He clinically collaborates with internationally respected Physiotherapist Diane Lee with whom he co-teaches in some of her educational programs.

Mark taught Tom Myers' Anatomy Trains™ courses in many international venues from 2005-2011.

He now teaches his own Myofascial assessment & treatment courses in Canada & Australasia.

He has treated successfully in a variety of therapeutic settings from touring internationally with the Riverdance Show to his current busy practice in Vancouver BC.

Rob Granter (B) 03 9459 1299 (M) 0417 542723 or email: rgranter@optusnet.com.au

ACT AS SOON AS POSSIBLE:

This course will book out quickly, to guarantee your place return this form as soon as possible.

PROFESSIONAL EDUCATION:

This course is accredited with IRMA for PD (Professional development) points & accreditation is pending with AAMT for CPE (Continuing Professional Education) points.

Participants will receive a Certificate of Attendance on completion of this course.

EDUCATIONAL PRE-REQUISITES

Must have taken the “Resolving Fascial dysfunction in the Pelvis” course with Mark

COST: A\$230

REFUND POLICY:

Cancel before September 10th: Full refund minus administration fee of \$50

Cancel after September 10th: 50% of paid fees refunded

WHAT OTHERS SAY ABOUT MARKS COURSES

“Fantastic seminar. Vital insight into the fascial system & its importance in pelvic function“

“Excellent workshop, clear concise description of biomechanics, effective techniques & essential anatomy“

“This course has definitely changed the way I think about treating the body.”

A well paced specialist class for passionate manual therapists. Mark shares his expertise with eloquent ease. Great skills with immediate clinical application

“Brilliant, extremely logical and sensibly planned and presented”
